

CONTRACTING DIVISION

COMPANY PROFILE

Civil Works | Temporary Fencing | Steel Works | Site Services

AL KHOBAR • KINGDOM OF SAUDI ARABIA

Built for Reliable Execution

ADVANCED BUSINESS PILLARS CO.

CONTRACTING DIVISION

ABP Contracting Division delivers practical civil and site solutions for industrial, commercial and infrastructure projects across Saudi Arabia. We combine clear planning, disciplined field execution and responsive project coordination to turn approved requirements into safe, durable and well-finished work.

Our Approach

- Understand the site, interfaces and commercial priorities before mobilization.
- Plan resources and work fronts around the approved programme.
- Control materials, workmanship, safety and documentation throughout execution.
- Close out each project with transparent inspection and handover records.

PLAN WITH CLARITY

EXECUTE WITH CONTROL

DELIVER WITH CONFIDENCE

Integrated Contracting Services

A flexible service portfolio allows ABP to support standalone work packages or coordinated multi-discipline site requirements.

1 Temporary Fencing and Hoarding

GI sheet fencing, perimeter hoarding, posts, rails, concrete bases, gates and integrated security lighting.

2 Earthworks and Site Preparation

Clearing, excavation, filling, grading, selected backfill, compaction and formation preparation.

3 Concrete Works

Foundations, equipment bases, slabs, plinths, kerbs, channels and minor reinforced concrete structures.

4 Steel Fabrication and Erection

Structural and miscellaneous steel, supports, frames, barriers, platforms and custom fabricated components.

5 Infrastructure and External Works

Drainage interfaces, paving, kerbstones, duct routes, utility supports and coordinated external works.

6 Fit Out and Maintenance

Partitions, ceilings, finishes, repairs, modifications, refurbishment and planned site maintenance.

ONE ACCOUNTABLE TEAM • CLEAR SCOPE • CONTROLLED DELIVERY

Temporary Fencing and Hoarding

SECURE PERIMETERS • CONTROLLED ACCESS • PROFESSIONAL SITE APPEARANCE

Complete Fence Packages

- Corrugated galvanized steel sheet fencing in project-specified height and thickness.
- Tubular steel posts, multiple horizontal rails, concrete foundations and durable galvanized fixings.
- Pedestrian and vehicle gates, corner bracing, returns and coordinated access openings.
- Fence-mounted LED security lighting, cabling interfaces and functional testing.
- Survey, shop drawings, installation, inspection, repair and optional dismantling.

Typical Delivery Sequence

Civil Earthworks and Concrete

GROUNDWORK THAT SUPPORTS EVERY FOLLOWING TRADE

From initial formation to finished concrete, ABP coordinates sequence, access, testing interfaces and workmanship to maintain a stable project platform.

Earthworks

- Site clearance and controlled excavation.
- Selected fill placement and layer compaction.
- Formation trimming, grading and level control.
- Disposal coordination and clean work-front handover.

Concrete Works

- Pad, strip and equipment foundations.
- Slabs, plinths, kerbs and drainage channels.
- Reinforcement, formwork and embedded items.
- Concrete placement, curing and inspection records.

Execution Controls

Approved setting out • Material verification • Hold-point inspections • Level and alignment checks • Concrete and compaction records • Punch-list closure

Steel Infrastructure and External Works

Steel Works

- Frames and supports
- Platforms and access steel
- Barriers and bollards
- Equipment skids and bases
- Custom fabricated items

External Works

- Kerbs and paving
- Drainage interfaces
- Utility corridors and ducts
- Site furniture foundations
- Roadside and boundary works

Maintenance

- Civil repairs
- Steel modifications
- Fence replacement
- Concrete reinstatement
- Planned corrective works

From Workshop Detail to Site Handover

- 01 Define** Confirm scope, dimensions, finishes and interfaces.
- 02 Detail** Prepare fabrication and installation information.
- 03 Fabricate** Control materials, cutting, assembly and coating repairs.
- 04 Install** Coordinate lifting, access, alignment and safe fixing.
- 05 Inspect** Verify dimensions, connections, finish and closeout.

A Controlled Path from Scope to Handover

1

UNDERSTAND

Review requirements, drawings, interfaces, access and site constraints.

2

PLAN

Develop submittals, programme, resources, method statements and inspection points.

3

MOBILIZE

Release work fronts, set out the works and establish safe execution controls.

4

EXECUTE

Coordinate labour, materials, equipment, subcontractors and daily progress.

5

VERIFY

Inspect completed stages, record tests and correct nonconforming work.

6

HANDOVER

Close punch items, submit records and complete client acceptance.

Quality Safety and Environmental Control

Quality is planned into the work.

Inspection points, approved materials, competent supervision and traceable records are integrated into the execution sequence rather than added at the end.

1

Material Control

Submittal approval, delivery inspection, storage protection and traceability.

2

Workmanship Control

Setting-out checks, stage inspections, dimensional verification and corrective action.

3

HSE Planning

Task risk assessment, permits, toolbox talks, PPE and controlled access.

4

Environmental Care

Housekeeping, spill prevention, waste segregation and responsible disposal.

Typical Records

Material approvals • Inspection requests • Daily progress reports • Survey checks • Concrete and compaction records • Electrical test sheets • Punch lists • Handover documentation

Responsive Resources for Site Execution

Each project team is scaled to the work package, programme and site constraints. Specialist resources are assigned where required and coordinated under one delivery plan.

Project Leadership

Project management • Site engineering • Planning and reporting • Commercial coordination

Field Supervision

Civil supervision • Fence and steel foremen • Electrical supervision • HSE coverage

Skilled Trades

Survey • Equipment operation • Steel fabrication • Fence installation • Concrete works • Electrical installation

Plant and Tools

Excavation equipment • Concrete tools • Welding and fastening equipment • Access equipment • Electrical test instruments

Supply Chain

Approved-source coordination • Material tracking • Fabrication scheduling • Delivery and storage planning

Documentation

Submittals • Method statements • Inspection records • Progress updates • Closeout files

RESOURCES ARE CONFIRMED AGAINST THE APPROVED PROJECT-SPECIFIC EXECUTION PLAN
